EDUCATION

VIT Bhopal University

Bachelor of Technology in Computer Science

Bhopal, India

Oct 2023 – May 2027

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Machine Learning, Operating system

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, JavaScript, MATLAB

Web Technologies: HTML, CSS, React.js, Node.js, Frontend Development Libraries

Developer Tools: Git, GitHub, VS Code

Core Competencies: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving, System Design

Soft Skills: Public Relations, Team Collaboration, Quick Learning, Communication

EXPERIENCE

GirlScript Summer of Code (GSSoC) 2025

Remote

Open-Source Contributor

Oct 2025 – January 2026

- Contributing to open-source projects as part of GSSoC'25, one of India's largest open-source programs
- Collaborating with developers worldwide to implement features, fix bugs, and improve code quality

VCab - VIT Transportation Service

Bhopal, India

Public Relations Team Member

Oct 2023 – Jan 2024

- Managed communication strategies and stakeholder engagement for VIT's official transportation service
- Coordinated outreach initiatives to improve service visibility and user engagement across campus
- Collaborated with cross-functional teams to gather feedback and enhance service delivery

PROJECTS

E-Commerce web Application | HTML, CSS, React js

2024

- Developed a responsive front-end e-commerce application using **React.js, HTML, and CSS**, implementing user authentication, dynamic product catalog, and shopping cart functionality.
- Built reusable React components and managed application state to enable seamless product browsing, cart updates, and interactive UI behavior.
- Applied modern JavaScript (ES6+) features and modular design principles to ensure maintainable, scalable, and performance-optimized code.

Phishing link detector Model | Python, scikit-learn, Pandas, NumPy

2025

- Built a machine-learning-powered phishing URL detector using 30 URL-based features and a trained classifier.
- Built a Flask app that checks URLs and predicts if they are safe in real time.
- Extracted meaningful URL features like domain age, redirects, and traffic rank to enhance model performance.
- Applied clean coding practices, modular design, and separation of concerns to ensure maintainability and extensibility.
- Utilized logging and exception handling to ensure reliability and robust error management.
- Followed version control best practices using Git for collaborative and structured development workflow.

- Built a Machine learning powered waste classifier model that help to classify illegal dumping waste and alert authorities.
- Uses JavaScript to determine the location of the person and tag it along the waste photos to determine the area of waste.
- Model Classifies the waste into different categories and help to determine the urgency level of the type of waste.
- User upload photos of the waste and fill the form then it automatically generates E-mail fot to be sent to authorities.

ACHIEVEMENTS & CERTIFICATIONS

Certifications

- Frontend Development Libraries Certification - freeCodeCamp
- Machine Learning Specialization - NPTEL
- MATLAB Certified Associate – MathWorks
- AWS Technical Essentials – AWS

Academic & Technical Achievements

- Selected for GirlScript Summer of Code 2025, competing among thousands of applicants nationwide.
- Active contributor to open-source community with multiple merged pull requests.
- Participated in SIH and MP Police hackathon and different coding competitions like that of on Leetcode, codechefs and TCS codevita
